Experience

GABO LLC - Freelance software engineer

10/2025 - Current

Switzerland

- Released frontend-auto-cms on npm, achieving 2.5k+ downloads in the past year, while maintaining it in production. Developed additional open-source software, including a Tauri desktop wrapper for 'web UI in a native window'.
- Delivered arturorodes.com using Astro, Alpine.js, and GSAP, creating editorial workflows with frontend-auto-cms to ensure marketing operates within defined parameters and integrates changes through the repository.
- Managed client projects and developed products like Puto Pulse (newsletter and automation), email and social integrations, and public npm tooling, implementing product team methodologies for scoped work and repeatable releases.

IriusRisk - Frontend developer

10/2024 - 10/2025

Huesca, Spain

- Enterprise threat-modeling UI: heavy React and TypeScript (Ant Design, TanStack Query, Zustand, SASS, Vitest). Regulated, audit-sensitive context; reliability and clarity actually mattered.
- Redesigned domain pages for improved navigation, layout, and user flows; contributed 20+ React components and addressed 100+ production issues over six months, earning second place in company hackathon.
- Scoped work with team lead (backend), collaborated on APIs, conducted PR reviews, and maintained production reliability as sole frontend developer.
- Public site: iriusrisk.com.

Independent period, self-directed

04/2024 - 10/2024

- Managed full-time job search while delivering public repos, desktop and web portfolio pieces (including Tauri), and interview artifacts, ensuring continuous engagement.
- Executed small releases with clear, readable commits and detailed notes, enabling effective screenshares to demonstrate actual work.

Skills

- Frontend development with React
- Mobile development with React Native
- Web development with HTML
- Testing with Jest
- Data visualization with Chart.js
- Database management with SQL
- Version control
- Package management with npm
- Software development lifecycle
- UI/UX design
- Project management
- Accessibility

Cybersecurity Management

Beyondbmi - Full-stack engineer
Dublin, Ireland

11/2022 - 04/2024

- Telehealth stack with sensitive health data: Angular on the web, React Native on member iOS and Android (store builds, device testing), TypeScript, Express, TypeORM, Postgres, AWS including Lambda, Stripe, messaging automation.
- Learned Angular on the job; first merge request in week one; about a month as the acting lead engineer while our senior was out (production database, nasty bugs, releases). Same heat, no title upgrade.
- Scheduling, video, clinical flows, integrations. Vitals charts with Chart.js (weight, blood pressure, related readings) and SMS/email reminders at 24h, 6h, and 1h before visits to cut no-shows. Contract wound down when the budget got tight near a milestone.
- Marketing: beyondbmi.ie.

GABO - Solo full-stack developer
Spain

08/2021 - 11/2022

- Converted project briefs into actionable deliverables, enhancing functionality for small businesses and startups.
- Futuria / Digital Kit, Rehubik automation: forms, SQL, Odoo, Zapier, APIs, Python, Google Apps Script. Mapped how data should move, got stakeholders aligned on the architecture, coordinated two freelancers on the implementation.
- Work through València accelerators; US entity for simpler international billing.
- Tronando, another client from the same period: normal engineering delivery; helped an intern with onboarding and day-to-day tasks for a short stretch (not a formal mentorship program).

talenTeal - UI designer
Valencia, Spain

07/2022 - 08/2022

- Designed user-friendly interfaces for web and mobile applications.
- Redesigned landing page to enhance structure and calls to action, focusing on B2B UI with accessibility for better stakeholder engagement.
- Reordered content blocks to prioritize important actions and trust signals, improving visibility for users.
- Conducted user research to gather insights for design improvements.

Lujo Network - Technical support specialist
Valencia, Spain

02/2022 - 03/2022

- Troubleshoot hardware and software issues for various customer environments.
- Documented technical problems and solutions in knowledge base articles.
- Streamlined sign-in paths and firewall rules, backup processes, and migrated operations from Google Sheets to a dedicated database.
