Availability / notice period	Initially 1 month.
Previous working experience at Roche	Yes / No - When? No
Place of residence	Nordstrasse 70 8006 Zurich
Date of birth (due to admin onboarding reasons)	October 29th 1997

AGENCY'S RECOMMENDATION:

Please write below

Dear Roche hiring team, I am applying for the Senior Frontend Developer / Tech Lead position. My CV is attached. I am interested in this role because it sits where careful frontend work meets standards you cannot shortcut. I want my next long stretch to be in software that people and organisations actually depend on, not only for speed of shipping, but for clarity, traceability, and trust. Roche is exactly that kind of place: life sciences at scale, where a calm, defensible UI is part of how operators, labs, and clinicians can rely on the product. That is also why the Tech Lead angle matters to me. I get energy from raising the bar with the team, clearer architecture and data-flow choices, reviews that teach without slowing everyone down, honest trade-offs with backend and product, and releases that do not feel like a gamble. I still want to be a strong hands-on contributor; I just do my best work when the frontend is coherent and the squad does not drown in accidental complexity. In practice, I have spent much of my recent career in settings that resemble that bar: at IriusRisk I was the sole frontend developer on a squad building a regulated, audit-sensitive enterprise React / TypeScript application (Ant Design, TanStack Query, Zustand, SASS, Vitest), with steady PR review, API collaboration, and production ownership. At Beyondbmi I worked with sensitive health data across Angular (web), React Native (iOS and Android), Node/Express, Postgres, and AWS, including a stretch covering lead responsibilities while our senior engineer was away, same pressure around incidents and releases, without a title change. I also have hands-on experience with a Tauri desktop wrapper, the same "web UI in a native shell" idea as Electron, when a product spans browser and desktop surfaces. I am based in Zürich (Nordstrasse 70, 8006 Zürich), hold Swiss Permit B, am happy to be onsite in Rotkreuz as required, and am planning to move to the Rotkreuz / Zug area long term to be closer to the team. Regarding engagement through Hays, I confirm the contractual and payroll terms as described in your email (including holiday options, withholding, salary payment timing, public-holiday treatment and supplementary rate, sick-pay rule, and accident insurance via Hays), together with the commercial confirmations already exchanged (including availability and exclusivity under my legal name Gabriel Clemente Ramos where required). Thank you for considering my application. I would welcome a conversation about how I can help Roche ship frontend work that earns trust in a domain where that is non-negotiable. Kind regards, Gabriel Clemente
